Period for Reply

A SHORTENED STATUTORY PERIOD FOR REPLY IS SET TO EXPIRE 3 MONTH(S) FROM THE MAILING DATE OF THIS COMMUNICATION.

- Extensions of time may be available under the provisions of 37 CFR 1.136(a). In no event, however, may a reply be timely filed after SIX (6) MONTHS from the mailing date of this communication.
- If the period for reply specified above is less than thirty (30) days, a reply within the statutory minimum of thirty (30) days will be considered timely.
- If NO period for reply is specified above, the maximum statutory period will apply and will expire SIX (6) MONTHS from the mailing date of this communication.
- Failure to reply within the set or extended period for reply will, by statute, cause the application to become ABANDONED (35 U.S.C. § 133).
- Any reply received by the Office later than three months after the mailing date of this communication, even if timely filed, may reduce any earned patent term adjustment. See 37 CFR 1.704(b).

Status

- 1) ☒ Responsive to communication(s) filed on 05 May 2003.

FINAL OFFICE ACTION

Claim Rejections - 35 USC § 102/103

1. The following is a quotation of 35 U.S.C. 103(a) which forms the basis for all obviousness rejections set forth in this Office action:

(a) A patent may not be obtained though the invention is not identically disclosed or described as set forth in section 102 of this title, if the differences between the subject matter sought to be patented and the prior art are such that the subject matter as a whole would have been obvious at the time the invention was made to a person having ordinary skill in the art to which said subject matter pertains. Patentability shall not be negated by the manner in which the invention was made.

2. Claims 8-12 are rejected under 35 U.S.C. 102(b) as anticipated by or, in the alternative, under 35 U.S.C. 103(a) as obvious over US Patent Number 5,626,692 to Rohatgi et al.

With regard to Claims 8-12, Rohatgi teaches a composite material which consists of a metal bulk material in which another material is homogeneously dispersed in the bulk material in a particulate form. The bulk or base material is aluminum while the dispersion material is carbon (Col. 2, Ln. 51-61).

It is the examiner's position that the composite material of Rohatgi is identical to or only slightly different than the composite material prepared by the method of the claims, because both composite materials are composed of either a metal or nonmetal as a base material with a dispersion of a metal or nonmetal as a dispersion material. Even though product-by-process claims are limited by and defined by the process, determination of patentability is based on the product itself. The patentability of a product does not depend on its method of production. If the product in the product-by-process claim is the same as or obvious from a product of the prior art, the claim is unpatentable even though the prior product was made by a different process. *In re Thorpe*, 227 USPQ 964, 966 (Fed. Cir. 1985). The burden has been shifted to the applicant to show obvious difference between the claimed product and the prior art product. *In re Marosi*,

Art Unit: 1775

218 USPQ 289 (Fed. Cir. 1983). Rohatgi anticipates the claimed subject matter. It is noted that if the applicant intends to rely on Examples in the specification or in a submitted declaration to show non-obviousness, the applicant should clearly state how the Examples of the present invention are commensurate in scope with the claims and how the Comparative Examples are commensurate in scope with the Rohatgi et al.

Response to Arguments

3. The examiner had objected to claim 11 in the office action dated February 3, 2003. This objection has now been withdrawn in view of the amendment filed by the applicants on May 5, 2003 amending claim 11 to overcome the objection.

4. Applicant's arguments filed May 5, 2003 have been fully considered but they are not persuasive.

Applicants argue that the composite material of the prior art (Rohatgi) is different from the instant invention in that the composite material of Rohatgi has the "possibility" of incorporating impurities while the instant invention does not.

The applicants must show a material difference between the component material of the Rohatgi and that of the present claim. The arguments are not evidence. There is no indication in Rohatgi of a non-uniform density, impurities or the appearance of cavities.

Conclusion

5. **THIS ACTION IS MADE FINAL.** Applicant is reminded of the extension of time policy as set forth in 37 CFR 1.136(a).

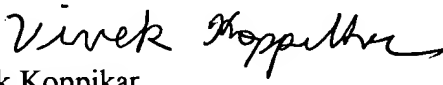

A shortened statutory period for reply to this final action is set to expire **THREE MONTHS** from the mailing date of this action. In the event a first reply is filed within **TWO MONTHS** of the mailing date of this final action and the advisory action is not mailed until after the end of the **THREE-MONTH** shortened statutory period, then the shortened statutory period will expire on the date the advisory action is mailed, and any extension fee pursuant to 37 CFR 1.136(a) will be calculated from the mailing date of the advisory action. In no event, however, will the statutory period for reply expire later than **SIX MONTHS** from the mailing date of this final action.
